Bosch eBike Systems

Customer FAQ

What is a Bosch-equipped electric bike (eBike)?

An eBike featuring the Bosch eBike system: electric motor, battery, display and accompanying app. Bosch motors only engage when the rider is pedaling, and the level of assistance can be adjusted to maintain a comfortable speed with reduced effort. Learn more about eBikes.*

Why choose a Bosch-ePowered eBike?

Founded in 1886, Bosch has a long history of innovation, safety and sustainability. We take pride in our award-winning motors, highly efficient rechargeable batteries, modern displays and control units, as well as the eBike Flow app. Additionally, we partner with our experienced, well-established dealer network to ensure they provide Bosch's standard of extraordinary service and support.

Are Bosch-ePowered eBikes safe?

For peace of mind, the entire Bosch eBike system is certified to UL 2849 standards to ensure the carefully engineered products are designed and developed to safely work together. Read more about safety.*

Does Bosch manufacture eBikes?

No. Bosch develops and produces the eBike systems—motors, batteries, displays, and apps—for bicycle manufacturers, which use those components to create dedicated eBike models. See the back of this page for a list of our featured North American brands.

What types of eBikes are equipped with Bosch eBike systems?

Our manufacturers offer bikes to fit your lifestyle from city, to touring, to mountain, to cargo eBikes. Use our eBike advisor to find the right bike for you.

Can an eBike be ridden without electric assist?

Yes, Bosch-equipped eBikes operate like conventional bicycles when the electric assist is set to "Off."

How is a battery recharged and how much time is required?

A Bosch eBike battery charges from a standard 110-volt wall outlet, either mounted or removed from the eBike. Charge times will range from 3-5 hours.

How far can an eBike be ridden on a single battery charge?

Range is affected by many variables, including frequency, level of pedal assistance, terrain and weather. The average Bosch-equipped eBike can get over 40 miles (65 km) of range. For a detailed breakdown of range estimates, visit the Bosch Range Calculator.

Where are Bosch-ePowered eBikes available?

Use the Bosch Dealer Locator Tool to find nearby shops carrying brands that use the Bosch eBike system.
